

Datamine International Ltd. – Moscow/Almaty Office

Senior Consultant, Mining Engineer – Open Pit

The Company

Datamine is one of the world's leading developers in geological modelling and mine planning software for the mining, geology and exploration industry. Datamine International is based in the United Kingdom and has sales and technical support offices in every major mining country around the world. We are currently expanding our business in Russia & CIS and seeking a Mining Engineer - Open Pit for our office in Moscow/Almaty.

The successful candidate will be involved in working closely with our clients in both long and short term open pit planning, mine design and scheduling by participating in consulting and implementation projects, as well as assisting in pre-sales activities and collaborating with prospects in Russia & CIS. This role will involve considerable travel within Russia and internationally, therefore we will require the successful candidate to hold a valid passport and be available to travel for varying periods of time.

The Position

Datamine International Ltd offers a competitive salary and benefits package. The position offers considerable opportunity for growth and advancement within Datamine, including international postings.

Qualifications & Skills

- Minimum B.E. in Mining Engineering.
- Excellent fluency in Russian and English - both written and spoken.
- Strong organizational, analytical, presentation and problem-solving skills.
- 3-5 plus years of professional experience in base and precious metals, coal and other commodities.
- Experience in open pit mine optimization and design.
- Experience in long-term and short-term open pit planning.
- Strong computer skills and must be an active user of mining software packages, specifically Datamine OP Solutions (Datamine NPV Scheduler, Studio OP or old Studio 3 open pit modules).
- A positive attitude and an enthusiastic desire to make a contribution to Datamine's business will be highly valued.
- Must be flexible with travelling to mine sites within the country and overseas. Average expectations are 10 days per month or 120 days per year.

Main Responsibilities

- Providing support to clients by analysing problems encountered and providing solutions.
- Conducting training courses at client sites under Russia & CIS, and if required, other countries under the Datamine International region. Countries under Datamine International are located in Europe, Middle East, Turkey, India, China Russia and CIS.
- Demonstrations and presentations of Datamine Open Pit Planning solutions .
- Participating in consultancy and effectively working with Datamine's existing and new clients to contribute to our long-term business growth within Russia and CIS, and if required, other countries under Datamine International region.

Relocation to Moscow or Almaty will be considered for successful candidates.
