

# Datamine International Ltd. – UK/Ankara Office

## Senior Consultant, Mining Engineer – Open Pit/Underground

### The Company

Datamine is one of the world's leading developers in geological modelling and mine planning software for the mining, geology and exploration industry. Datamine International is based in the United Kingdom and has sales and technical support offices in every major mining country around the world. We are currently expanding our business in countries under Datamine International Ltd region (Europe, Middle East, Turkey, India, China Russia and CIS) and seeking a Mining Engineer – Open Pit or Underground Planning (Design & Schedule) for our office in [UK/Ankara](#).

The successful candidate will be involved in working closely with our clients in both long and short term open pit/underground planning, mine design and scheduling by participating in consulting and implementation projects, as well as assisting in pre-sales activities and collaborating with prospects in countries under Datamine International region.

This role will involve considerable travel within [UK/Ankara](#) and internationally, therefore we will require the successful candidate to hold a valid passport and be available to travel for varying periods of time.

### The Position

Datamine International Ltd offers a competitive salary and benefits package. The position offers considerable opportunity for growth and advancement within Datamine, including international postings.

### Qualifications & Skills

- Minimum B.E. in Mining Engineering. (Master's Degree will have privilege)
- Excellent fluency in [English](#) - both written and spoken. If you are applying to work in the Turkey office, excellent fluency in [Turkish](#) will be also required.
- Strong organizational, analytical, presentation and problem-solving skills.
- 5-8 plus years of professional experience in base and precious metals, coal and other commodities.
- Experience in open pit or underground mine optimisation and design.
- Experience in long-term and short-term open pit or underground mine planning.
- Strong computer skills and **must be an active user of mining software packages, specifically Datamine Open Pit Solutions (Datamine NPV Scheduler and Studio OP) or Datamine Underground Software Solutions (5DPlanner & EPS & MSO). Knowledge of both our open pit and underground software solutions will have privilege over other candidates.**
- A positive attitude and an enthusiastic desire to make a contribution to Datamine's business will be highly valued.
- **Must be flexible with travelling to mine sites within the country and overseas. Average expectation is 10 days per month or 120 days per year.**

### **Main Responsibilities**

- Providing support to clients by analysing problems encountered and providing solutions.
- Conducting training courses at client sites under Datamine International region. Countries under Datamine International are located in Europe, Middle East, Turkey, India, China Russia and CIS.
- Demonstrations and presentations of Datamine Open Pit/Underground Planning solutions.
- Participating in consultancy and effectively working with Datamine's existing and new clients to contribute to our long-term business growth within the Datamine International region.

**Relocation to UK or Turkey will be considered for successful candidates.**
