ADVANCED GEOSTATISTICS
Accurately & Efficiently Estimate Mineral Resources

WHO USES ADVANCED GEOSTATISTICS?
- Resource Geologists
- Geostaticians

sales@dataminesoftware.com | dataminesoftware.com
Advanced Geostatistics is a state-of-the-art, industry benchmarked software solution for mineral resource and reserve estimation. The sophisticated software provides access to a comprehensive set of geostatistical algorithms that can be used, and comes as an additional module to the renowned Studio RM. The software has a Guided Workflow which is an integrated set of dialogs that lead the user through the steps required for a univariate or multivariate estimation study. In addition, all the standard Studio commands are conveniently available from the ribbon.

**FEATURE HIGHLIGHTS**

- Uniform conditioning & SMU analysis.
- Data import & analysis.
- Variography with 3D maps & multivariate autofitting.
- Kriging Neighbourhood Analysis (KNA).
- Multivariate kriging.
- Conditional simulation for recoverable resource evaluation & classification for recoverable resource evaluation.
- Up to 100x faster estimates compared to using ESTIMA.

**KEY BENEFITS**

- Increase confidence in your estimates.
- Greater accuracy and precision.
- Risk management.
- Time saving tool.
