

SAMPLE STATION

Versatile Field
Sampling Solution

WHO USES SAMPLE STATION?

- Geologists

SAMPLE STATION

Collect and store your field sample data – **Sample Station** is a versatile field sampling and real-time environmental monitoring application that allows for rock, soil, water, air and other environmental material data to be collected and stored. **Sample Station** is fully configurable based on your workflow. Create custom logging tables and eliminate potential transcription errors by generating customisable picklists. The application also features a built-in QA/QC module as well as custom export and reporting capabilities.

SAMPLE STATION BENEFITS

- ✓ Decrease the turnaround time of validated sample data.
- ✓ Ensure accuracy and consistency between project team members.
- ✓ Increase the confidence and accessibility to your sample data.
- ✓ Consolidate data from heterogeneous data sources into a secure data repository.
- ✓ Gain insights through internal audits.
- ✓ Validate and monitor sampling accuracy and precision.
- ✓ Capture data at the source.
