

# MineScape 2021 Update 1

## RELEASE NOTES

September 2021

### RELEASE INFORMATION

#### ABOUT THIS RELEASE

After releasing MineScape 2021 with much fanfare and excitement, the team has worked hard to bring you some exciting new enhancements and fixes to the software. Update today and check out the awesome updates as we *RAPIDLY* bring you new content!

#### WHAT'S IMPROVED

**Figure 1:** MineScape is a set of integrated apps that can be loaded via the Start Page. Stay tuned for new apps coming soon as we aggressively deliver new content in every release.

Have an idea for a new MineScape app or feature -- drop us a line, and let's discuss it. We are always available to hear new ideas and requests.... in fact, we love it!

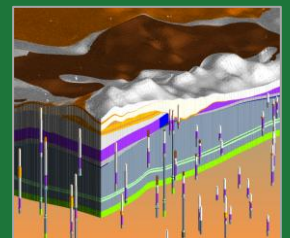

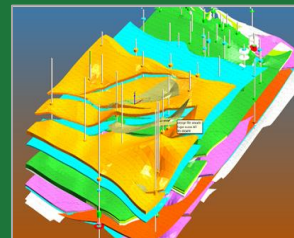

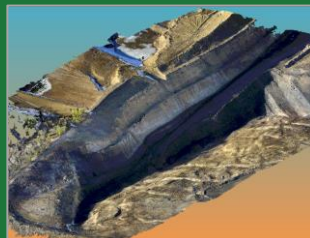

#### Hot Features

- Support importing 100,000 or more Maptek Vulcan triangulations and creating one efficient compressed multi-mesh file
- Creating a Surface Mesh can now be re-limited on multiple picked polygons
- Renaming and rebranding to our new *Interactive Bench Blocks* option
- When drawing new elements, you can now show vertices of existing elements as your cursor goes near them
- The *MineScape Help* now has quick buttons to go "Back, Forward, and Print". You'll see these on every Help page!
