

## Open Pit Mining Engineer | Job Profile

---

### The Company

Datamine is a world leading provider of the technology and services required to seamlessly plan and manage mining operations. With operations in thirteen countries, Datamine provides solutions ranging from exploration data management and orebody modelling to mine planning and operations to over 1,400 companies worldwide. Our software solutions integrate with our consulting and training services to ensure that we provide our clients with industry-leading support and expertise.

### The Role

Datamine is currently seeking an experienced engineering professional to join our consulting team. The Perth CBD based role will be to use your skills with Datamine's open pit software to provide implementation and consultancy services as well as support for Datamine's existing open pit clients.

Datamine's engineering solution spans Optimisation, Long – Medium – Short Term Planning, Design and Scheduling, Drill and Blast and Supply Chain management, hence the candidate will gain a significant broad exposure to the mining cycle as well as exposure to a wide range of clients and commodities.

The role would include frequent travel to mining operations for mentoring and training as well as short term FIFO contract work filling in for engineering roles at client operations.

### Skills Required

- Degree majoring in Engineering from a recognised tertiary institution, preferably with Honours.
- 3+ yrs recent experience in open pit mining operations
- Recent experience with Datamine's Open Pit software essential
- Well-developed written and verbal communication skills
- A demonstrated ability to work within a team and maintain strong stakeholder relationships.
- Must have the right to live and work in Australia to apply

### Apply

If you are interested in applying for this position, please send your resume and cover letter to Pedro Ladeira, Consulting Team Leader at [pedro.ladeira@dataminesoftware.com](mailto:pedro.ladeira@dataminesoftware.com).
